Executive Summary- FY2025

Revenue	Profit Margin
6.36B ↑3.83%	46.89%

Total Orders	Operating Profit
25,813	3.98B ↑3.96%

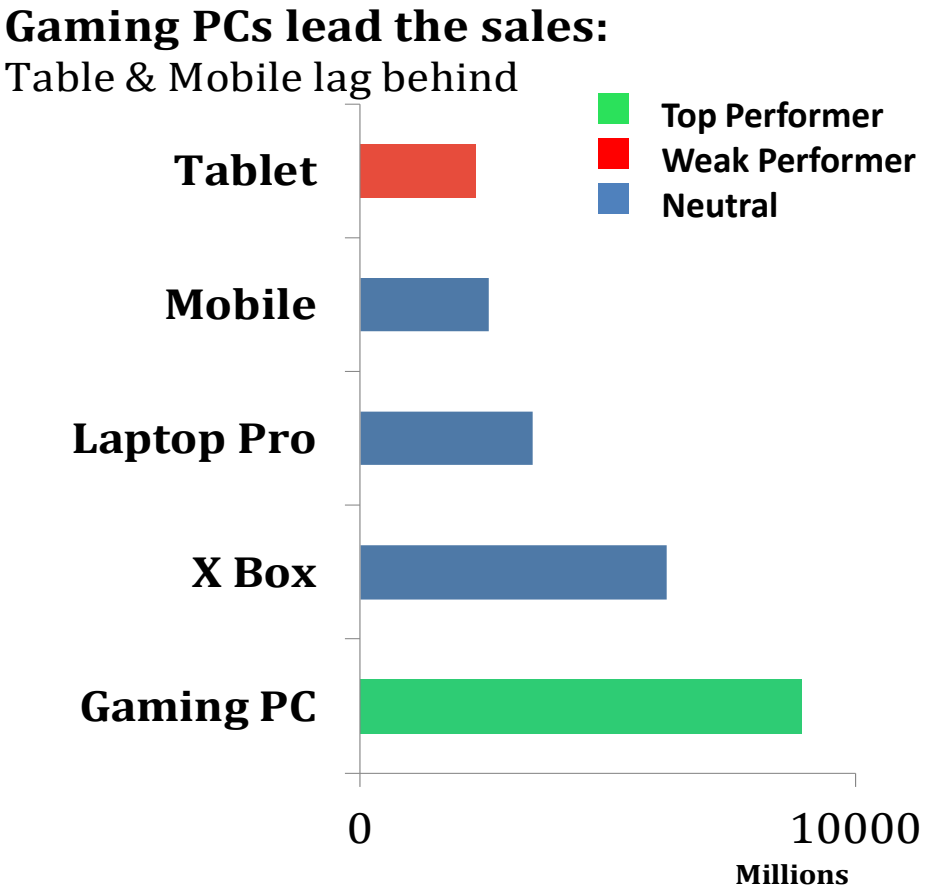

- Growth is steady but slow(~4%)→ Prioritize scaling high-performing categories (Gaming PCs) to accelerate revenue growth.
- High profit margin (46.89%) → Allocate budget to marketing and expansion instead of over-optimizing costs.
- Strong order volume (25k+)→ Improve average order value (bundling and upselling) to increase revenue without needing more customers.

Revenue Contribution by Region

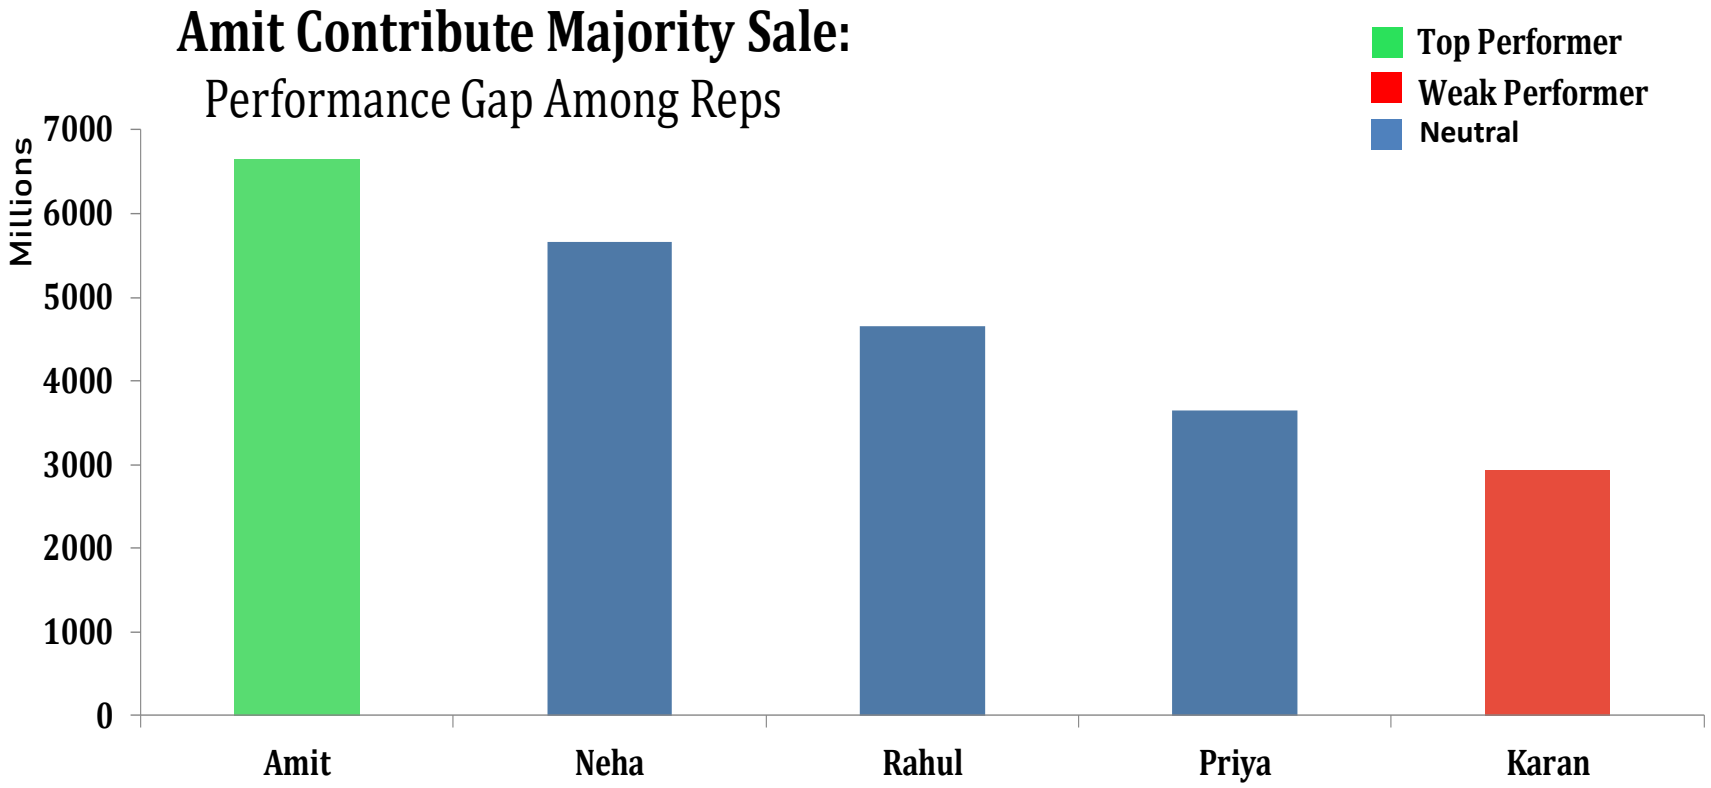

- West region leads→ increase investment and expansion here.
- East & South stable→ Maintain and gradually optimize performance.
- Central underperforming→ Conduct root-cause analysis (pricing, demand, distribution).

Category-wise Revenue Distribution

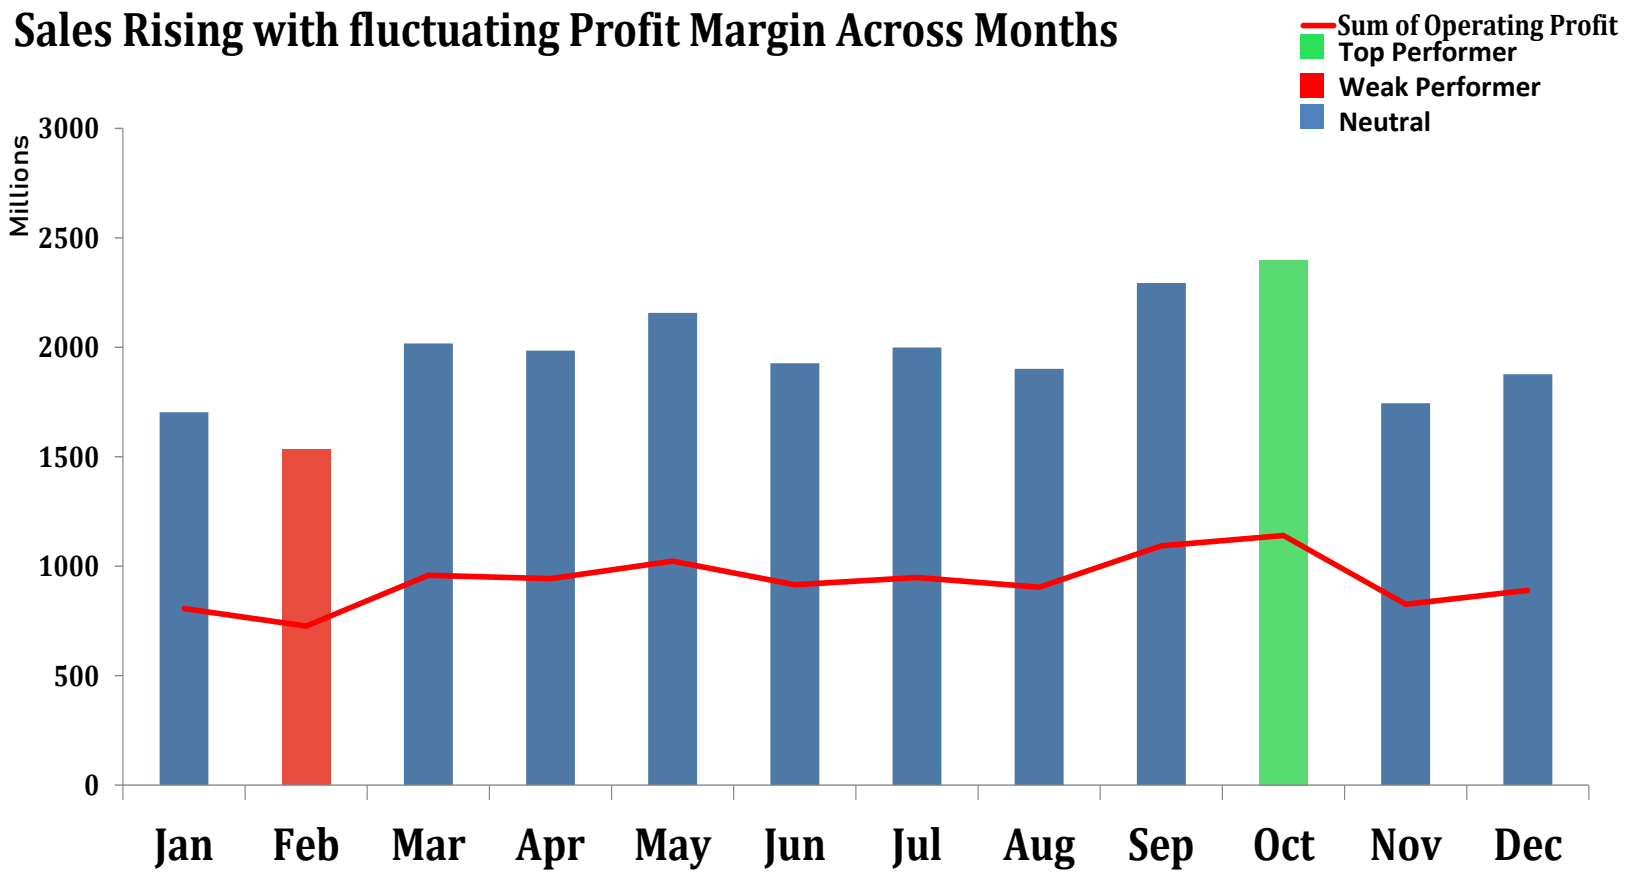

- **Gaming PCs dominate revenue→ Double down on this segment through targeted marketing and inventory expansion.**
- **Tablet underperformance→ Re-evaluate pricing or reduce focus, as it's not contributing meaningfully.**

Sales Representative Performance

- **Amit drives majority sales→ Analyze and replicate his strategy across other reps.**
- **Mid Performers→ Provide targeted training to improve conversion rates.**
- **Karan underperforming→ Immediate performance review or reassignment needed.**

Monthly Revenue Trend Analysis

- Revenue is increasing→ Scale operations to support growth demand.
- Profit margin fluctuating→ Investigate cost drivers and stabilize expenses.
- February dip→ Plan promotions or campaigns to avoid seasonal drop.
